

Your partner in the delivery room
Partura® – The delivery table

A Sense of Company

With more than 90 years of experience, SCHMITZ is one of the leading international manufacturers of medical products.

A family-owned business with a living tradition. Our typical employee has been with the company for some 18 years, proof of how strongly they identify with our values and philosophy.

In 2012, the company's management passed to Friedrich and Matthias Schmitz, the fourth generation of the family.

We are proud to be located in Germany and are deeply rooted in our home region. We develop and manufacture here.

90 % of our suppliers are from Germany, of which 60 % are from the local region.

Made in Germany

A Sense of Care

We understand the services which are our lifeblood, and aim to achieve maximum customer satisfaction. From consulting through planning to installation.

Cost-effectiveness through longevity is what you can expect from us.

With a well thought-out service concept and comprehensive support, SCHMITZ works alongside you as partner from start to finish.

SCHMITZ – represented worldwide

Idea: Karin Berghammer/Iris Podgorschek
Design: podpod design

Partura® C€MD**combining comfort, flexibility and safety**

As much freedom of movement as possible for the mother-to-be during the first and second stages of labour and individual adjustment of the table via the hand control – at all times. This is the idea behind the design of the delivery table.

The pleasantly padded lying surface is large enough to allow active support by the partner. The midwife may use the foot section as a seat.

The delivery table manufactured by SCHMITZ meets all requirements:

It combines an attractive design with great comfort for the expectant mother and optimum working conditions for the obstetrics team.

In addition, the closed, smooth claddings and the padded areas are easy to clean and disinfect.

If required, the table may be adjusted in just a few steps to allow rapid surgical intervention.

Partura® – The delivery table for a safe and gentle birth.

Partura® **combining comfort, flexibility and safety**

Versatility

Partura® is distinguished by its versatile birthing positions combined with its large range of movement.

Individual colour schemes

With our wide range of colours, the Partura® will fit perfectly into any room and create a pleasant atmosphere.

You are welcome to try out all of the possible combinations. Please use our colour configurator on our homepage, see QR code at the bottom of this page.

Experience “life” together

Share the birth of your child with your partner.
A beautiful experience for the growing family.
Birthing partners can always be involved if desired thanks to the large lying surface and pull-out foot section.

Partura® Positions

First stage of labour

table in lowest position (64 cm) to alternate between relaxation and movement, the low table height facilitates getting up and down from the table

Birth in lithotomy position

classical position

Birth in Trendelenburg position in shoulder dystocia

surgical interventions or manual expulsion

First stage of labour and/or transitional stage in knee-elbow position

in cases of urge to bear down prior to full dilatation of the cervical os and in intrauterine asphyxia

Birth in knee-elbow position

for multiparas with a previous epidural to relieve the perineum and with particularly large children

Post partum, with birth in knee-elbow position

new mother can simply sit back after delivery, without having to turn around

Second stage of labour in vertical position with raised back section

comfortable sitting position even without a partner; the recess in the mattress means that no pressure is applied to the perineum. Manual expulsion possible in breech presentation

Second stage of birth in vertical position with partner
the parturient may lean against her partner, bodily contact

Birth in crouching position
optimization of the birth axis, maximum kyphosis, perineum is relieved

Birth in crouching position with partner
who can lift the parturient slightly when the head emerges, bodily contact

Surgical delivery
forceps delivery or vacuum extraction, manual expulsion in breech presentation
post partum to care for the perineum, in manual removal of the placenta

Caesarean section in delivery room
in case of absolute indication

Shock position
in prolapse of the cord or circulatory collapse

Leg elevation
for relaxation

Partura® C€MD and accessories

Model No.	Description
-----------	-------------

140.1010.0	Partura® Delivery table
-------------------	--------------------------------

	Main section with seat and backrest, foot section. Mobile thanks to swivel castors with a central locking mechanism via a foot pedal. Main and foot section are separable; the foot section can be pushed under the main section and engaged in four positions. Includes two wired hand controls.
--	--

	The standard features of the Partura® delivery table can be found on page 19.
--	--

104.6010.0	Cushion to support the back
-------------------	---------------------------------------

104.6020.0	Fitted cover
(w/o ill.)	for two-part pad, white, may be washed up to 95 °C

Model No. Description

104.6030.0 Supporting bar
to stabilize the shoulder girdle, powder-coated steel tube, tiltable and height adjustable, with two SST 18/10 swivel-type clamps, mounting on side rails

104.6040.0 Handles (pair)
detachable, powder coated steel tube, attachment to back section, SST 18/10 clamp

made of SST 18/10, 355 x 325 x 100 mm (L x W x D)

104.6060.0 Foot supports (pair)
SST 18/10 attachment, foot plates of plastic material, grey

Partura®**fully equipped for a comfortable birth**

The foot section can be detached from the main section to allow better access for the midwife and doctor – and used as a seat or table.

- Parallel and separate electromotive height adjustment of main and foot section.
- Easy cleaning and disinfection thanks to closed, smooth surfaces, detachable upholsteries.
- Mobile by means of swivel castors – central braking system.
- 22 standard colours for an attractive colour design.
- Manifold possibilities of adjustment, high stability and a lot of space for all different labour-facilitating positions – also involving the partner.
- Electrical adjustment function via two easy-to-reach hand controls.
- Softstart function of all bed movements.
- Multifunctional back rest, insertable at main and foot section.
- Leg supports with ball and socket joint for a fast adjustment out of park into use position.
- Operational reliability at temporary power failure thanks to integrated batteries.

Easy and fast storing of leg supports under the top or swinging back, if required.

Back rest may also be attached at the foot section.

If not required, handles may be stored at the head end of main section.

Main switch, potential equalization, battery indicator, socket acc. to IEC 60230 C13.

Infusion rod may be attached at the head or on the left or right-hand side.

Fixing lever for locking of foot section.

Handgrips for an easy movement of foot section.

Two hand controls with helix cable, situated left and right hand at main section.

Partura® CEMD**Standard equipment**

Main section featuring seat and back, foot section; on casters, central locking device. Main and foot sections may be separated. The foot section may be pushed under the main section, four locking positions. Seat section features a recess of 150 mm radius.

Two-part pad for main section and foot section made of highly elastic coated foam, moisture repellent and secured against slipping.

1 two-part cover, white, may be washed up to 95 °C.

Casing and frame made of powder coated sheet steel, available colours acc. to SCHMITZ colour chart. Back rest may be attached at the head or foot end, with imitation leather covering in stone grey 96.

Two Göpel-type leg supports, stainless steel 18/10, integral foam pad in silver-grey, height adjustable. Two rotating joints to attach the leg supports. Quick changing of leg supports e. g. from parking position to shock position. Two handles, stainless steel 18/10, integral foam in silver-grey, may be attached at the sides.

Infusion rod with 4 hooks, stainless steel 18/10, may be attached at the head and near the handles, height adjustable. Back support near the seat recess, semi-circular, integral foam silver-grey, for birth in squatting position.

Two hand controls with helix cable, left and right of the main section, for infinite adjustment driven by an electric motor:

- Height of main section
- Back section
- Seat section
- Inclination of top (shock position)
- Height of foot section

Operational reliability at temporary power failure thanks to integrated batteries.

Colours

- Two-part pad for main section and foot section: stone grey 96
- Back rest pad: stone grey 96
- Leg supports, handles and back support: integral foam silver-grey.
- Sheet steel parts: powder coated acc. to SCHMITZ colour chart
